SAVED THE BRIDGE

Small Boy's Prompt Action
Averts a Serious Loss.

Lewis Williams, Jr., a son of Mr.
L. G. Williams, a twelve year-old
boy, discovered the wooded supports
of the L. & N. bridge, two miles
north of the city, to be on fire Mon-
day and telephoned the news to the
agent here, who sent an engine with
men and water to the scene in quick
time and put out the fire before se-
rious damage had been done. The
boy's thoughtfulness and prompt ac-
tion are being much praised.

FANCY PRICE

Realized For Wool Crop By
Newstead Farmer.

Capt. J. W. Riley sold his crop of
wool Tuesday, at Newstead, to Lan-
der Bros. for 30 cents a pound.
One sheep sheared 14 pounds, bring-
ing him \$4.20 for the fleece. The
sheep averaged nearly 11 pounds
each of wool.

At prices like these the sheep-rais-
ing industry ought to flourish to an
extent that would make it one of
the farmer's most fruitful sources
of revenue. Capt. Riley is one of the
county's most progressive farmers
and has a fine flock of sheep.

Ben Franklin's Advice

should be heeded by everyone in
these days as assiduously as when
our grandfathers took pleasure in
reading poor Richard's almanac.
Ben Franklin said that "the road to
wealth is as straight as the road to
market," if you know what road to
take, which would be the road to a
good savings bank like the Commer-
cial and Savings Bank.

Did it ever occur to you why all
good business men keep a checking
account with a bank? We'll tell
you. It enables them to keep their
funds in a more secure place than
the office safe. It gives them a
better standing in the business
world. It enables them to pay their
bills by check, the returned check
being an undisputable receipt.

Individuals find a checking ac-
count very convenient and a source
of saving. Money in one's pocket
is often spent on the spur of the
moment, while one is disposed to
think twice before drawing on his
balance in the bank. GET THE
SAVINGS HABIT. Lay up for a

rainy day. Start a bank account with

A Mistaken Idea.

A False notion prevails in this community
concerning THE TIME FOR HOUSE
BUILDING.

Nearly three-fourths of the building in this section is done during the last four months of the year.

This results in two disadvantages to the owner.

First, he pays higher prices than when work is scarcer.

Second, it results 9 times out 10 in the plastering and painting and other particular parts of the
work on a house being done in cold weather. June, July, August and September are the cream of
the year for house building.
